

Third Party Inspection Company

They inspect all of our cranes to ensure they are DOT and OSHA certified yearly

ACIS inspectors hold either NCCCO and Crane Institute of America Inspector certifications or both to ensure we are getting a thorough inspection. The inspectors are trained to certify all of our fleet.

Our customers deserve the security of knowing our cranes are safe and inspected by trained individuals and a third party. All of our cranes have individual certifications that are available upon request and provided for customers who need the documentation routinely as part of their work packet.
